

ALTERNATE ENTRY PATH PROGRAM GUIDELINES

Revised November 2023

PROGRAM OBJECTIVE

- The Alternate Entry Path (AEP) program allows international medical graduates who are certified by the national anesthesiology organization in the country where they trained and practicing anesthesiology in the U.S. to qualify for entrance into the ABA examination system for initial certification in anesthesiology. The objective of the program is to encourage outstanding internationally trained and certified anesthesiologists to become productive members of U.S. academic anesthesiology programs. A record of documented achievement in teaching and/or scholarship, rather than the potential for future success, is critical to acceptance into the AEP program, as is the ability of the sponsoring department to provide an outstanding academic environment.
- AEP program participants will spend four years in an academic anesthesiology training program as fellows, researchers, or faculty members. Participants are expected to actively participate in departmental educational activities and to otherwise retain or gain basic anesthesiology knowledge and experience that would help them to attain ABA certification.

QUALIFICATIONS

- When the anesthesiology department enrolls the international medical graduate in the AEP program through either the clinician educator pathway or the research and fellowship pathway described below, the department must have an anesthesiology residency or fellowship training program with "continued full" ACGME accreditation status. Anesthesiology departments may have as many as eight international medical graduates enrolled in the AEP program at one time. A letter of justification from the department chair is required and will be reviewed for approval for any amount over four (effective Jan. 1, 2024).

CLINICIAN EDUCATOR PATHWAY

To be considered for entry into the AEP Clinician Educator Pathway, physicians must:

- Be internationally trained with 4+ years (3+ years of anesthesiology-specific training) of post-graduate medical education.
- Have a letter of support from the sponsoring program's chair and program director.
- Be board certified in anesthesiology from an ABA-approved certifying body.
- Have an active clinical appointment for a minimum period of four years after enrolling in the AEP program.
- Have an academic appointment in a department of anesthesiology with an ACGME-approved residency and should be an outstanding clinician educator in the field of anesthesiology.
- Have the sponsoring program's department chair and program director submit a four-year mentoring plan for future academic development as a clinician educator, co-signed by the physician, for prospective approval by our Credentialing and Continuing Certification Committee. We must receive the four-year plan no later than four months before the department enrolls the internationally certified anesthesiologist in the AEP program and the four-year period of continuous experience commences.
- Demonstrate excellence in teaching and excellence in clinical anesthesiology during the four-year period specifically designed and identified for the physician.

RESEARCH & FELLOWSHIP PATHWAY

To be considered for entry into the AEP research or fellowship pathway, physicians must:

- Be internationally trained and certified anesthesiologists practicing in the U.S.
- Be internationally trained with 4+ years (3+ years of anesthesiology-specific training) of post-graduate medical education.
- Have a pre-existing track record of scholarship as represented by the scholarship of discovery, dissemination and application. The scholarship of discovery is accomplished by obtaining peer-reviewed funding or by publication of original research in peer-reviewed journals. The scholarship of dissemination is accomplished by publication of review articles in peer-reviewed journals or chapters in textbooks. The scholarship of application is accomplished by publication of case reports or clinical series at local, regional, or national professional and scientific society meetings. High-quality ongoing scholarship is critical to acceptance into the AEP program.
- Have an active clinical appointment for a minimum period of four years after enrolling in the AEP program.
- Have the chair of the anesthesiology department that sponsors them submit a four-year plan, co-signed by the physician, for prospective approval by our Credentials Committee. We must receive the four-year plan no later than four months before the department enrolls the physician in the AEP program and the four-year period of continuous experience commences.
- Demonstrate discovery of new knowledge in the specialty, excellence in teaching and excellence in clinical anesthesiology during the four-year period specifically designed and identified for the physician.

PERIODIC EVALUATION REPORTS

- At six-month intervals, the program must attest that the AEP physician is still a fellow or faculty member with a full-time primary appointment in an ACGME-accredited program or is still actively engaged in research. At the same time, the department chair will provide an assessment of the physician's performance during the preceding six months relative to the American Board of Medical Specialties- and ACGME-approved six general physician competencies.
- All AEP participants must annually take the In-Training Exam (ITE). Once participants achieve a score of 40 or higher, they no longer need to take the ITE.

CERTIFICATION ENTRANCE REQUIREMENTS

- AEP participants must complete the planned and approved four-year program in one anesthesiology department before we will accept them as candidates for primary certification. Our policy book lists the registration eligibility requirements all physicians must fulfill to be accepted as a candidate.
