

Changing Your ABA Status to "Clinically Active"

A "clinically active" diplomate practices anesthesiology or a recognized anesthesiology subspecialty, on average, at least one day per week during 12 consecutive months over the previous three years.

Please complete the attestation form below to request a "clinically active" status.
Fax it to (866) 999-7503 or email it to credentialing@theaba.org.

- Before we will remove the "not clinically active" status, we require evidence that you have resumed clinical practice and meet the minimum clinical activity requirement.
- You must provide the date you resumed practice and references. We will also seek attestations regarding your practice, verify that you are clinically active and verify the status of your medical license(s).
- When we have received all of your information, the Board will review your case and determine if the "not clinically active" status designation can be removed from your record.
- If the Board approves the status change to "clinically active" and you are participating in the Maintenance of Certification in Anesthesiology® (MOCA®) program for a time-limited certificate, we will inform you of the specific MOCA program requirements you will complete to maintain your certification status.
- When we change your status to "clinically active," we will report your status to the American Board of Medical Specialties.

ATTESTATION FORM TO CHANGE YOUR STATUS

Name _____

Date of Birth _____ ABA ID# _____

Please report all of your clinical activity in anesthesiology or a recognized anesthesiology subspecialty, including institution-based practice, office-based practice, locum-tenens practice and training in accredited or non-accredited anesthesiology programs.
